DESCRIPTION

Angular impact wrench 1/2"

HIGH PERFORMANCE

New-technology product providing access to narrow spaces.

Its high-performance rotary motor (6,000 rpm delivering torque of 271 Nm - without any torque reaction) coupled with bevel gears ensures a smooth transmission.

TECHNICAL

Identical length of the head and handle for good weight distribution.

Its dust-proof octagonal head ensures perfect pressure on the impact socket.

PRACTICAL

Thanks to its very fine profile, the use of short impact sockets provides access where a conventional wrench would not be able to go.

Ideal wrench for difficult-to-access areas designed for industrial maintenance, farm workshops, car and HGV garages.

Two different materials, machined metal head giving robustness, composite handle for greater comfort.
