DESCRIPTION

Electronic welder for plastic repair

This hot plastic repair technique can be used to effectively reinforce and repair broken or cracked plastic parts (bumpers, headlights, trimmings, etc.). The gun can be separated from the body of the machine, it can therefore be replaced in the case of failure. 220V connector allowing a soldering iron (optional) or other accessories to be used. External fuse holder for a quick repair in the case of replacement. Technical information: Voltage: 230 V, 50 Hz Consumption: 5W max. Dimensions: 170*90*90 mm h Weight: 1.35 kg. Staples: No protrusion of the arms once broken. No need for grinding. No projection of the staple arms in the workshop or on to the floor. No risk of injury (projection into the face or eyes). Component: STAINLESS STEEL 316L Melting temperature of thermoplastics: 125°C to 150°C

STANDARDS / DIRECTIVES

2014/30/UE, 2014/35/UE
