DESCRIPTION

Automotive plastic repair box

Just one rod made of polypropylene makes it possible to repair virtually all plastics. 18/10 quality steel grids melted into the mass thanks to our soldering iron fitted with a special bit will make indestructible reinforcements and supports. No trimming, no bubbling. No breakage when putting the bumper back in place. Repair without removal (shock absorbers or attaching parts). Some repairs can be made without removing the bumper. Time savings and gains in productivity. Cost of repair reduced to a few Euros. Just one filler rod for nearly all plastics. Car-Motorbike-HGV. Non-perishable products. No deformation of the support materials. Return on investment right from the first repair.
