DESCRIPTION

Stainless steel reinforcement mesh

18/8 stainless steel reinforcement grid to prevent any risk of oxidation. Melts into the mass of the plastic on a hole or crack, with the soldering iron fitted with its special iron-shaped bit. The molten plastic penetrates through the meshes of the grid, like a multitude of tiny rivets, ensuring excellent resistance to impacts, vibrations and tearing. Packaging: Bag of 2 grids. Dimensions: 25 cm x 12.5 cm.

SPECIFIC DATA

Designation	STAINLESS STEEL REINFORCEMENT MESH
Sales reference	1400-PROX
