DESCRIPTION

Vertical polishing machine - 180 mm

EFFICIENT

Its power/speed combination (510 W - 2,000 rpm) makes this a high-performance polisher for polishing industrial vehicles, its one-piece steel casing means it can be used for intensive jobs.

COMFORTABLE

The assembly of its internal components in 'stages' ensures this is an extremely well-balanced polisher.

The polygonal-shaped casing along with its offset-axis handles ensures it comes into perfect contact with the part as well as a good working position for the operator.

It has all the equipment expected for this level of technicality:

Comfortable sheathed handle. Lateral exhaust through the auxiliary handle. Variable speed control.

The semi-soft self-gripping backing pad (Ref. 19580) ensures a very wide range of polishing, buffing wools and foams can be used.
