DESCRIPTION

Mini angle-grinder, 115° - 6 mm

PRACTICAL

Its head angled at 115° ensures better visibility for certain jobs and better access to conical shapes. The angle has been calculated so that the force cannot be offset when pressing on the part being ground.

ROBUST

The machining of the 115° steel head is done in a single piece for greater strength.

Mini-grinder with its head angled at 115° is intended for general maintenance applications and places that are difficult to access.

Very good weight/speed ratio.

Composite casing with comfortable sheath.

Silent ductable rear exhaust.

Safety lever.

Variable speed control placed on the top.
