DESCRIPTION

Aluminium reversible revolver drill with automatic chuck - 13 mm

LIGHTWEIGHT

This power driver weighing less than one kilo is 30% lighter than competitor products in the same category, which predisposes it for repetitive or precision jobs.

QUALITATIVE

The quality of the trigger allows you to adjust the speed without damaging the surface of the drill bit's angle of attack, notably for coated bits.

Drill suitable for lengthy drilling operations.

Much sought-after for its weight/power ratio. It is also appreciated for its light weight and low noise level, as well as for its low vibration coefficient.

Aluminium body. Non-slip handle. Three integrated air outputs.

Handle that can be completely surrounded by your hand for a better grip.

Very good balance which makes it very comfortable to use.
