## DESCRIPTION

## SAMSOPLUS® joiner's hammers, three-material handle

**SAFETY:**Head-handle attached with two-component epoxy resin. Separation: 200% of the wood handle standard. Thrust: 400% of the standard. **COMPOSITION:**1) Bone-shaped fibreglass: full rigidity. Withstands changes of environment. 2) Polypropylene: lower vibration levels. 3) SEBS overmoulding: to ensure the handle is ergonomic. **COMFORT:**The overmoulding provides an ergonomic shape for a perfect grip and complete adherence. The wider lower part of the handle means the hammer will not slip out of your hand in movement. **PRECISION:**Head with its finely polished tapered shape.

Forged carbon steel head. Non-slip material. Ergonomic fibreglass reinforced handle. Head + handle bonded with epoxy adhesive. Finely polished tapered head.
