DESCRIPTION

Riveting hammers

PRECISION: The handle is fitted with a metal wedge that splays out the wood to prevent any ejection. The resin prevents the wood from drying out. **SAFETY:** The head is made of forged carbon steel and finely polished with a tapered shape. **COMFORT:** The shape of the SAM wooden handle provides a good grip and very great mechanical strength.

French model

hickory handle

head forged with carbon steel

finely polished bit and impact face

handle: metal wedge to prevent drying-out + resin (araldite®) to prevent desiccation of wood

presentation: head covered with epoxy paint
