DESCRIPTION

No-rebound small hammers + clip

Safety: To ensure your interventions are safe, to avoid dropping tools and wasting time, to prevent industrial accidents and improve productivity = Opt for the SAM anti-dropping solution. All the products in the FME range are equipped with a clip preventing you from dropping your tools.

Specially recommended for delicate assemblies. Body and handle made of light alloy. Interchangeable end-pieces. Anti-rebound system with metal micro-beads. The serration in the head prevents loosening of the faces in use. The striking surfaces do not mark the hammered parts. Rubber anti-vibration handle. Supplied with two hard end-pieces. **POWER:** The head of the hammer is filled with metal micro-beads. These micro-beads create inertia at the time of impact which eliminates the recoil effect. You recover 30% additional striking power. **SAFETY:** The steel beads limit the risk of metallic parts bursting. **SAM's opinion:** A hammer that combines power and safety, ideal for delicate assemblies
