DESCRIPTION

Dead-blow mallets

POWERFUL:The head of the small hammer is filled with metallic microbeads.These microbeads create an inertia at the time of the impact which eliminates the rebound effect. You recover an additional 30% of the impact force.**SAFETY:**The steel beads limit the risk of metallic parts bursting.

For powerful punching without marking. Body and handle made of light alloy. Interchangeable end-pieces. Metal micro-beads eliminating the rebound effect. The serration in the head prevents loosening of the faces in use. The striking surfaces do not mark the hammered parts. Rubber anti-vibration handle. Supplied with two hard end-pieces.
