DESCRIPTION

Universal cooling liquid pressure testing box

Application: used to quickly and simply detect leaks in the cooling system on a broad range of engines. Content: Pressure pump with pressure gauge (0 to 2.5 BAR / 0-350 PSI) with quick-connect coupling. Thermometer (0° - 200°C). 16 ABS adaptors with different colours. 1 ABS wrench for tightening adaptors. 3 metal adaptors. 2 universal adaptors. Broad universal coverage (see application guide). Operation: injecting pressure into the system. If the pressure holds there aren't any leaks. If the pressure does not hold, there is a leak. All the components have quick-connect couplings for greater safety and time-saving. Supplied in a box with foam insert for better control of the tools.

SPECIFIC DATA

Designation	COOLING LIQUID PRESSURE TESTING BOX
Sales reference	913-12K

SAM Outillage

10 rue Camille de Rochetaillée
