## DESCRIPTION

### Alternator pulley remover kit

Suitable for all jobs carried out on the alternator for installing and removing the V-belt pulley. Essentially used on the following vehicle marques: Renault, Peugeot & Citroën, as well as Volkswagen, Audi, Seat and Skoda. This tool is essential for removing the nut that is located around the pulley pin (idler or disengageable) by keeping the pulley blocked. We recommend installation and removal should be carried out with a torque wrench with reference to the torque value recommended by the manufacturer. Caution, certain screw threads are reversed. Do not force on the Torx, Xzn or 6-flat bit which will not withstand a prolonged, intense force in the wrong rotation direction. Weight: 1.980 kg.

## SPECIFIC DATA

Designation	KIT TO REMOVE THE ALTERNATOR PULLEY
Sales reference	99-PA2
