DESCRIPTION

Multifunction battery charger 12v

Computer reprogramming operations are increasingly required on modern vehicles. To do this a constant voltage must be maintained with a current that may be as high as 50AMP. This charger is ideal for performing this task. In addition to this function, this device can be used to charge 15 and 30 AMP batteries. The purpose is to provide the user with a battery charger with a stabilised power supply:- Charge batteries with a device that has an advanced charging curve- Support 12V batteries (gel or liquid) of vehicles in the diagnosis phase- Guarantee good battery condition for demonstration vehicles in the showroom- Meet the electrical needs to save memories, when changing the battery- Use the charger as a stabilised power supply whose maximum voltage and current can be adjusted. Reliable stable power supply: a reliable source of power when reprogramming a vehicle (upgrading the ECU). Powers a car's battery for demonstrations in the showroom. A universal solution for your everyday use. Multifunction platform: Power supply unit (50 Amp max.) and 30 Amp & 15 Amp battery charger.
