DESCRIPTION

Module foam 1 : universal tool for injector removal

Specific for disassembling very locked injectors. Often, the injector is locked in its seat due to fouling caused by burning and can not be removed without a proper tool. The injector is extracted both mechanically and hydraulically thanks to the universal extractor adaptable to different cylinder heads and to the special flat hydraulic cylinder (optional).

SPECIFIC DATA

Designation	INJECTOR PULLER FOAM PAD
Sales reference	DDE-SET-P1
