## DESCRIPTION

### Ultrasound cleaning device

Ultrasound cleaning appliance with stainless steel tank for cleaning various parts, notably small car parts, watches, coins, jewellery, CDs, DVDs, glasses, etc.

The ultrasounds in the solution alternately generate high and low pressures.

Millions of microscopic bubbles form during the low-pressure phase and expand.

The bubbles implode in the high-pressure phase releasing a considerable amount of energy.

They act in every direction, attacking the surface and penetrating into all the cavities and interstices.

Electrical power supply 220-240 VAC 50 Hz

Power 50 +/- 10 W.

Dimensions 228 x 183 x 158 mm.

Tank capacity 1300 ml.

Frequency 40 KHz.

Weight 2.15 kg
