DESCRIPTION

WEAR TESTER FOR BRAKE PADS

The brake pad wear tester is an ingenious tool allowing you to save time when measuring the brake pad lining on vehicles without having to remove the wheel.

Can be used on internal and external brake pads.

Its slender shape allows you to place it easily behind the brake pad's backing plate and measure the distance between the underneath of the backing plate and the brake disk.

Scale calibrated for a normal backing plate with a thickness of 6 mm.
