DESCRIPTION

Pneumatic disc brake piston pushing tool

For pushing back brake piston callipers effortlessly and in complete safety. Pneumatic tool with 1/4" threaded air coupling. Knurled ring used to control the pressurisation of the calliper. The contact pin is equipped with a 3/8" drive square. Which makes it possible to install all the pads that exist at SAM. A 3/8" adaptor with 2 studs makes it possible to install other pads. Force handle making it possible to control the tool in use. The only multi-marque, universal tool.
