DESCRIPTION

Adjustable engine gear box vehicle support beam bar

Ideal for working on engines when the supports have to be removed.

Belt change, clutch. The engine / gearbox support crossbar has been developed for use with cars and small vans. It is designed to support the engine and the gearbox, despite the removal of mechanical parts in the framework of repair works.

The crossbar is attached directly to the floor of the vehicle.

Length: 1,030 mm - Working width: 940 mm (between front and rear support).

Max. width: 400 mm - Support plat max. travel: 190 mm.
