## DESCRIPTION

### Set of linear knife with accessories

Knife in box with 2 blades and sheath 100 mm, 2 blades and sheath 200 mm, 2 blades and sheath 300 mm, protective goggles. This patented tool is used to cut window seals bonded from the inside of the vehicle. The blade is guided by a sheath that makes it possible to adjust its cutting length following along the window opening and guide it whatever the type of vehicle. This operation does not create any risk of damaging the bodywork or the dashboard. This tool allows you to remove a new windscreen without any risk of breakage and without damaging the vulcanised seal found on certain vehicles. It also makes it possible, under the same safety conditions, to cut the lateral protections and other elements on the bodywork. It is fitted with new ribbed blades made of spring steel ensuring optimum cutting power and a long service life. This is the original tool the most used worldwide for this type of intervention. Knife in a box with: 2 blades and sheath 100 mm, 2 blades and sheath 200 mm, 2 blades and sheath 300 mm, protective goggles.
