DESCRIPTION

Screwdriver insulated 1000V Hex female

Accessible: Undercut blade to ensure the insulating protection does not create any overthickness. The blades are designed to access the most restricted spaces, without any risk of damaging the insulation, for interventions in complete safety.

USE: Products for use in tightening and loosening the most inaccessible nuts, they enable access to nuts even with protruding threaded rods. CHARACTERISTICS: Perfectly smooth rear hinge for enhanced comfort during intensive use. Ergonomic handle for comfort while enabling powerful tightening. Plus a rotating hinge to help during approximative tightening, and to limit wear or damage due to friction against the insulating glove.

STANDARDS / DIRECTIVES

NF ISO 691, CEI 60900, NF EN 60900
